FORMATION

BACHELOR'S DEGREE IN
COMPUTER SCIENCE (IOT &
EMBEDDED SYSTEMS)

2021 - 2024

BACCALAUREATE

El Amel Fouchena Secondary
School
2021

SKILLS

- AI: AI/GenAI, Machine Learning
- Development: Web/Mobile (React.js, Flutter, Express.js)
- Data Science: Python (Pandas, Scikit-learn, Matplotlib)
- Systems: Docker, Kubernetes, LoRaWAN, ChirpStack
- Soft skills: Project management, teamwork
- Automation tool: N8N

ACHIEVEMENTS

Top 3 – Hackathon Chain & Brain Fusion Tech: AI × Blockchain

Top 5 – Hack'n'Biz Hackathon Multidisciplinary entrepreneurial and technological challenge

LANGUAGES

- French
- English
- Arabic

PROFILE

Passionate about artificial intelligence, machine learning, and IoT, I design intelligent solutions by combining real-time sensors, data processing, and embedded systems. Holding a Bachelor's degree in Computer Systems (IoT & Embedded Systems), I am proficient in web/mobile development, data analysis with Python (Pandas, Scikit-learn), as well as containerization tools like Docker and Kubernetes, and automation tools like N8N. My rigorous and innovation-driven approach allows me to effectively contribute to high-impact technological projects.

PROFESSIONAL EXPERIENCE

EAZYCODE ACADEMY

Trainer in Generative AI and Automation | 7 September, Present

- Training professionals (teachers, accountants, HR agents) in generative AI: RAG, fine-tuning, GAN, prompt engineering, and no-code AI tools.
- Designing and presenting functional workflows on n8n, including the first steps in automation and creating intelligent scenarios.

TECHNOZOR

PFA Internship | 7 June 2023 - 7 August 2023

- Development of a web application using React.JS for the front end.
- Development of a back-end application using Express.JS.

DEVNET

PFE Internship | 17 January 2024 - 17 May 2024

- Design and prototyping of a smart vacuum cleaner capable of detecting flames and dangerous gases, with development of a mobile application (Flutter + Express.js) ensuring communication with the device and real-time display of sensor data.

TECH4IOT

July 2025 – September 2025

- Deployment and configuration of a local GitLab server for version management and collaborative work.
- Installation and configuration of a ChirpStack server for managing a LoRaWAN IoT network.
- Deployment of an ML model achieving 98% accuracy in toxic gas detection.

COMMUNITY LIFE

Secretary General of GAMING-LAB

member of Maker-Labs

member of IEEE ISTIC student brunch

member of AJCC ISTIC
